

CAULIFLOWER (KAULI)

SOIL

Rich + Deep + Light

- Mix the soil
- Take off the rocks
- Put compost or natural Fertilizer

COMPANIONS

Radish
Cress
Beans
Cucumber

Squash
Grapevine

SEEDLING & SUN

Cauliflower likes the sun (at least 6 hours a day)

- Put the seed 1 or 2 cm deep
- Put the seeds 50 cm away from each other
- Put water
- After more than 2 days, the plant will come out of the soil

WATER

- Water the soil in the morning & evening
- The soil has to be humid all the time

Do not water the leaves to avoid diseases

PLANT CARE

- Add some compost or natural fertilizer to help your plant to grow
- When the head reaches the size of an egg, cover it with the leaves to protect it from the sun
- If you see some insects pests, look on the internet

HARVESTING

Duration of growth: 6 months

- Harvest the head when its diameter is around 15 cm
- With a knife, cut the head and a few of the leaves
