

GARLIC (Lashun)

SOIL

Poor + Sandy + Light

- Mix the soil
- Take off the rocks
- Create a mound of soil (15 cm high)

COMPANIONS

Tomato
Cucumber
Potato

Cabbage
Bean

SEEDLING & SUN

Garlic likes the sun

- Put garlic clove 1 or 2 cm deep inside the mound of soil
- Put the garlic cloves 10 cm away from each other
- Do not put water if the soil is wet

WATER

- If there is no rain, water the soil only 1 time a week

Garlic doesn't like too much water !

PLANT CARE

- Take off the weeds
- Break the hard soil around the plant

HARVESTING

Duration of growth: 5 - 8 months

- When the leaves become yellow, make a knot on them. The garlic cloves will grow better
- Take off the garlic plant a few weeks later
- Dry it a few days with the sun
