

BEANS (Simi)

SOIL

Rich + Light

- Mix the soil
- Take off the rocks
- Put compost or natural Fertilizer

COMPANIONS

Cabbage
Cucumber
Corn
Marigold

Garlic
Onion

SEEDLING & SUN

Beans like the sun

- Put the seed 1 or 2 cm deep
- Put 2 seeds in the same hole, 30 cm away from each other
- Put water
- Beans like climbing so prepare a support (2 meters high)

WATER

- Water the soil in the morning & evening
- The soil has to be humid all the time

Do not water the leaves to avoid diseases (powdery mildew)

PLANT CARE

- After 15 days, put soil 10 cm high all around the stem
- If you see small white flies, they like eating the leaves. You can put some flowers (marigold) or aromatic plant (basil, rosemary or mint) to make them go away
- If you see some drops on the leaves, you can put some garlic decoction everyday

HARVESTING

Duration of growth: 3 months

- Harvest the beans when the vegetable is 12 or 15 cm long
- Harvest the beans every 2 or 3 days to allow the plant to maintain its production
