

# CORIANDER (Dhaniyā)

## SOIL

*Light + Rich*

- Mix the soil
- Take off the rocks
- Put compost or natural fertilizer

## COMPANIONS

Potato

## SEEDLING & SUN

*Coriander likes the sun*

- Put the seed 1 or 2 cm deep
- Put the seeds 15 cm away from each other
- Put water
- After more than 1 week, the plant will come up from the soil

## WATER

- Water in the morning and evening
- The soil has to be wet all the time during the first week

Do not water the leaves to avoid diseases

## PLANT CARE

- Take off the weeds around the plant
- When the flowers come, cut them to have more leaves

## HARVESTING

Duration of growing: 1 month

- Cut the upper part of the plant first
- Harvest when you need
