

# ZUCCHINI (Ghiraunko)

## SOIL

*Rich + Sandy + Light*

- Mix the soil
- Take off the rocks
- Put compost or natural Fertilizer

## COMPANIONS

Radish  
Mint  
Bean

Potato

## SEEDLING & SUN

*Zucchini likes the sun*

- Put the seed 2 or 3 cm deep
- Put the seeds 80 cm away from each other
- Put water
- After more than 2 days, the plant will come out of the soil

## WATER

- Water the soil in the morning & evening
- The soil has to be humid all the time

Do not water the leaves to avoid diseases (powdery mildew)

## PLANT CARE

- Take off the weeds
- Take off the damaged leaves
- If you see white spots on the leaves, it's a mushroom called "powdery mildew". You have to take off the damaged leaves and put a decoction of garlic everyday

## HARVESTING

Duration of growth: 2 months

- Harvest the zucchini when the vegetable is 20 cm long
- When the vegetable is longer than 20 cm, the flavour is not as good and seeds becomes numerous and big
