

GRAPEVINE

SOIL

All kind of soils

- Mix the soil
- Take off the rocks
- Put compost or natural Fertilizer

COMPANIONS

Radish
Cabbage
Cauliflower

SEEDLING & SUN

Grapevine likes the sun

- Put the seed 1 or 2 cm deep
- Put the seeds 1,5 m away from each other, make a support to help the plant grow correctly
- Put water

WATER

- Water the soil if it is the drought

Do not water the leaves to avoid diseases (powdery mildew & mildew)

PLANT CARE

- If you see white spots on the leaves, it's a mushroom called "powdery mildew". You have to take off the damaged leaves and put a decoction of garlic everyday
- If you see brown spots on the leaves, it's a mushroom called "mildew". You have to take off the damaged leaves

HARVESTING

- Gather the grape when the grains are big and purple
